What is "Bulky Waste"

- Bulky waste refers to large items that are more than about 30 cm on one side. However, items that would obstruct the crushing process are handled as bulky waste even if they measure less than 30 cm.
- Futons that cannot fit into the designated collection bag are considered bulky waste.
- If you have a large amount of bulky waste because you are moving in or out, you must handle the waste on your own. You will therefore be introduced to collection companies.
